

Customer information about used open source licenses

The Product IES3 Smoke Evacuation Unit with Erbe REF 10323-000 and software version V1.0.x contains software components, that are licensed by third parties as free software or open source software ("OSS") under the licenses specified below.

The license terms specified below apply to the respective OSS components and prevail with respect to the OSS components over any other terms and conditions applicable to the Product. Erbe provides the OSS components to you free of charge.

To the extent, the applicable OSS licenses put Erbe under an obligation to provide the source codes for these OSS components. The source codes can be obtained from us by submitting a request to our Technical Support Team at the following address within three years after purchase of the Product.

Otherwise, you can also download the license texts and sources directly from the Erbe homepage.

Important information

We have prepared this document with care. Nonetheless, we cannot completely rule out errors in this document. The information, recommendations and other data (“Information“) contained in this document reflect our state of knowledge and the state of science and technology at the time of preparing the document. The information is of a general nature, non-binding and serves solely for general information purposes and does not represent instructions for use or notes on application.

The information and recommendations contained in this document do not constitute any legal obligations by Erbe Elektromedizin GmbH as well as their associated companies (“Erbe“) or any other claims against Erbe. The information does not represent a guarantee or other quality statement, these require the express contractual arrangement with Erbe in individual cases.

Erbe shall not be liable for any type of damage resulting from following information given in this document, regardless of the legal reason for liability.

Every user of an Erbe product is responsible for checking the respective Erbe product for its properties as well as the suitability for the intended type of application or intended purpose in advance. The suitable type of application of the respective Erbe product is given by the user manual and the notes on use for the corresponding Erbe product. The user is obliged to check whether the existing user manual and the notes on use correspond with the status for the specific Erbe product. The devices may only be used according to the user manual and the notes on use.

The information on setting values, application sites, duration of application and the use of the respective Erbe product is based on the clinical experience of physicians independent from Erbe. They represent guidelines which need to be checked by the user for their suitability for the actual planned application. Depending on the circumstances of an actual application case, it may be necessary to deviate from the information provided. The user has to check this on his/her own responsibility in each case when using an Erbe product. We wish to point out that science and technology is constantly subject to new developments arising from research and clinical experience. For this reason it may be necessary for the user to deviate from the information provided in this document.

This document contains information about Erbe products which may possibly not be approved in a specific country. The user of the respective Erbe product is obliged to inform him/herself whether the Erbe product he/she is using is legally approved in his/her country and/or if legal requirements or restrictions for use possibly exist and to which extent.

This document is not intended for users in the USA.
